

DECOBLEND

It is a complete equipment for an efficient and almost painless needle electro epilation. The epilation is due to the automatic combination of 2 currents, radio frequency called thermolysis and the low Voltage current (continuous current) called electrolysis. By using both mixed currents at low intensity (the first one with thermic effect and the second one with cauterizing effect), it is possible to recognize the positive effects of the two methods: it means a painless epilation on all over the body areas.

DEC 32 - SUPPLIED ACCESSORIES:

1 needle-holder (AC0667/32); 1 client electrode (AC0624); 1 client electrode cable (AC0665); 1 pedal (AC0668);

10 universal disposable sterile needles (AC0636/A); 1 line cord (AC0661).

AC0667/32

AC0661

AC0665

AC0624

AC0636/A

AC0668

POWER SUPPLY:	230 V 50 - 60 Hz
OVERALL DIMENSIONS:	25x24x7 cm
WEIGHT:	4 Kg
FUSES:	2 of 250 mA
POWER CONSUMPTION:	16 Watt
MAXIMUM OUTPUT POWER:	210 Vpp - 2.8 Mhz - 0,5mA (10 k LOAD)
TIMER:	0-99 minutes
