EVA SP 6

This system allows not only a quantitative nutational infrasonic infiltration but also a nutational infrasonic liposculpture.

Manufactured for a safety liposculpture respecting the non fatty structures.
 Entirely digitalized system.

The EVA sp[®] 6 includes :

- Lipomatic[®] 3
- Digitalized control box
- Quantitative infiltration system
- High-speed aspirator
- Complete set of cannulas
- Accessories

The EVA sp[®]6 is a complete system:

- The quantitative infiltration system allows to control the infiltrated quantity in different zones, to control permanently the total volume infiltrated and to reconsider every zones infiltrated.
- The system of pistons ensures an homogeneous infiltration at a constant pressure, whatever the type of fat, even fibrous.

Advantages :

- Shorter operative time and post-operative recovery
- Less tiring and more precise work
- Treatment of all the zones of the body
- Reduction of the pain
- Reduction of the complications occurring with other techniques (manual or assisted)
- Constant, deep, homogeneous and controlled infiltration, whatever the type of fat, even fibrous.
