Siaretron 4000 E

INTENSIVE CARE VENTILATOR

A new level of excellence in the field of lung ventilation

Patients receiving mechanical ventilation are the most vulnerable in hospitals. It's also well known that assisting this kind of patients requires at the same time concentration, effort and creativity not only by operators but also on the equipments used.

The new ventilator SIARETRON 4000 E combines a wide range of performance-enhancing functions with several advanced ones.

Granting both, invasive and non-invasive ventilation of high standard regardless the severity and type of the patient, from adults to children.

Bed Unit

- Advanced standard functions and a wide range of parameters for specific treatments.
- More efficiency in the daily routine thanks to a higher concentration on the essential aspects and to an intuitive running.

In any hospital ward

- More user-friendly and comfortable in any kind of transport thanks to its small dimensions and low weight.
- More efficiency in the treatment of the critical patient thanks to the ventilator's adaptive features.
- More efficiency and costs reduction.
